Objective

To take up challenging career and grows with honesty, loyalty, good relationship and best performance and translate my knowledge, skill and ability into value for an organization.

Experience

- Just Mind Work(JMW) Pvt. Ltd** 01-01-2024 - to present
Project: Billeazy
Writing, debugging and maintaining code for web application. Developed REST ful API's to enable communication between server and client app. Led the development of Billeazy, a comprehensive billing and inventory management system designed to simplify and streamline the billing process for customers and businesses. Spearheaded the project from scratch, work with team of 10 developers and ensuring timely delivery of key features.
BillEasy – Invoice & Receipt template system.
 - Designed and developed a dual-mode template system supporting B2B(A4/AT invoice template) and B2C(58/80mm thermal receipt template).
 - Implemented B2B invoice templates with A4/A5 formats, preview functionality, PDF generation, and direct printing support.
 - Built B2C thermal receipt templates optimized for 58mm and 80mm printers with fast, direct print execution.
 - Created an intelligent template selection mechanics based on template type and preview configuration.
 - Developed a barcode template system using HTML-based layouts with dynamic placeholder replacement.
 - Implementation server-side HTML-to-image conversation using wkhtmltoimage to generate high-resolution barcode image.
 - Enabled bulk barcode printing with quality -based generation for inventory management.
 - Designed company-specific template configuration, allowing customization of layout, alignment, font size , visibility and custom text.
 - Implemented multi-language support (English, Hindi, Bengali, Marathi, etc.) with language selection independent of the UI.
 - Built RESTful APIs for template management, barcode generation, and mobile app integration using Base64 images.

Role : Full Stack Developer

Technology : Ruby on Rails, React js, React Native, PostgreSQL.

Responsibilities :

Full-Stack Development : Worked extensively with Ruby on Rails for backend API development and React for building dynamic, responsive user interfaces.

- Just Mind Work(JMW) Pvt. Ltd** 01-06-2023 - 25-12-2023
Project: Jambar App(Service provider app)
This Project is based on services that means this app is mediator between the customer and supplier. Both are login face provided, each together communication using chat module and share image, audio and video. Suppliers like painter, mechanic and housekeep and electrician etc.
Implement and enhance CRUD operations for the application using the MVC(Model View Controller) architecture of Rails framework.
 - Developed user registration and login functionality using Devise gem and integrated Pundit gem for advanced role based access control, enhancing security.
 - Built REST ful API's to manage tasks and user data ensuring efficient back end communication.
 - Designing and implementation database schemas, migrations and queries using post grewal.
 - Using rails admin for implementation Authorization in this app.
 - Using twilio integration for SMS service and Firebase for Message notification in app

Role : Backend Developer

Technology : Ruby on Rails, PostgreSQL

Responsibilities :

Backend Development : Ruby on Rails for backend API and active admin development.
